

Subject: RE: Centralized Form Processor Optimization

Date: Tuesday, June 16, 2026 at 11:33:02 AM Mountain Daylight Time

From: Baker, Cuc

To: McInnis, Paul J, Skaff, Farris, Corbin, Floyd, Mayo, Chloey, Clark, Gavin S, Mondrus, Eugene D, Gupta, Himanshu, Jain, Sandeep, Cordingley, Russ

Thank you Chloey, Floyd, and Farris for your time and letting us know that it is possible to make the separate calls to trigger the appropriate CloudPage. We will provide more technical details on our end.

[@McInnis, Paul J](#) – We have availability to add a POC story into the July sprint since we moved the MCP story out. This POC will be to continue to solve the failed async call issue we experienced in this sprint. We can investigate and test a solution with the AEM team in the lower environments as a part of the POC. Is that OK with you?

Thanks,
Cuc

Subject: Centralized Form Processor Optimization

When: Tuesday, June 16, 2026 12:00 PM-12:25 PM (UTC-06:00) Central Time (US & Canada).

Where: Microsoft Teams Meeting

Hi Chloey, Farris, Floyd –

We are working on enhancements for Bill to optimize the Centralized Form Processor. The original architecture was to have two separate CloudPages, one to capture the data and another for backend processing. However, we ran into an issue where we couldn't make the async call between the two CloudPages.

We have an idea that we'd like to explore with your team, which involves making two calls to SFMC CloudPages instead of one:

-1st call to a CloudPage so the data is captured in a DE, and the user gets an immediate confirmation (currently there is a 20 sec delay)

-2nd call to a CloudPage so kick off the necessary backend processing

We'll provide more details on the call, but please reach out if you have any questions in the meantime.
